For future Mentors.

1. Become a better leader
Learning how to work with people to whom you don't have a natural connection, demonstrating patience with those in need of guidance and support, helping people figure out the best path forward: all trademarks of a great leader AND skills honed through mentoring. The more you work at leadership on a one-to-one basis, the more you'll improve in larger group settings.

2. Learn more about your company or profession
What do you actually know about the challenges, purpose and daily workload of other teams? Mentoring is a great way to broaden your view and gain insight into what goes on in other areas. This will equip you to make sounder, more holistic decisions.

3. Achieve personal career gains
Just in case you're thinking that all this talk of leadership and learning is a soft sell, let's dish up some hard facts. Between 2010 and 2013 Sun Microsystems studied the career progress of over 1,000 employees. People who had acted as mentors were SIX TIMES more likely to be promoted than those who didn't, and 20% more likely to get a raise. Still think mentoring is a fluffy, feel good thing to do?

4. Shape the leaders of tomorrow
Most of us long for a legacy, some stake in the future that says, "I was here." What better legacy than to be a part of shaping tomorrow's leaders?

5. Gain new perspectives and fresh ideas
Mentoring is a unique opportunity to step outside your normal circle of friends and social media's echo chamber to gain an intimate understanding of how the world looks through someone else's eyes. New perspectives lead to fresh ideas, and who knows where fresh ideas could lead you?

6. Put your finger on the pulse of a younger generation
Usually (although not always) mentors end up working with younger mentees, sometimes much younger. Different generations think and act differently. If you are to be an effective leader, you need to have an understanding of how younger generations see things and where they can make a difference to the organisation. The intimacy of a mentoring relationship offers a unique insight into these generational differences.

7. Change someone's world
Do you remember a teacher, a coach or a former boss who said or did something that changed the trajectory of your life? This is your chance to do that for someone else. Not every mentoring partnership is life changing but we see enough of it to know that every mentor has the potential to instigate surprising change.

8. Exercise emotional intelligence
Working one-on-one with a mentee requires you to sharpen your emotional radar. You will be called upon to gauge the emotional state of the other person and respond with empathy. Not only is emotional intelligence a key differentiator for career advancement, it can also improve your relationships outside the office.

9. Strengthen the lessons you've already learned
There is no better way to embed knowledge than through teaching. You've learned the hard way how to hire the right person, raise prices or negotiate a tough contract. By passing this knowledge on to a novice, you clarify and embed those lessons within yourself.

10. Improve productivity
Sharing your insights, learning and networks with younger colleagues helps to grease the organizational wheel. Stepping up the pace and increasing productivity helps everyone within the organization – including you.

11. Feel good about yourself
Tell yourself all you want that you're doing it for your resume, but we guarantee you that once you become a mentor, the "feel good" factor will take hold. There is little more rewarding than knowing you are making a difference to someone else's life.

Ready to SignUp

Thank you for signing up to be an ITEC mentor.

Mentors / mentees typically meet once a month for six months. We'll provide you with mentor training, guidelines, a mentoring agreement and will support throughout the process.

Please fill in this form with as much information as you can, so we can make the best possible match.

Please note:

By completing this form it does not guarantee that you will be matched with a mentee
If you are matched, it may take some time for us to pair you with someone.
Priority is given to our employer partners.

Contact information

First name*

Last name*

Phonetic spelling of your name (if you feel it would be helpful).

Phone number

What are your preferred pronouns?*

Please select...

LinkedIn

Employment status

Current employer (please state if freelance)*

Current employer website*

Current job title*

Have you ever worked in a freelance capacity in the creative industries (film, publishing, media, etc?*

... Yes ... No

Career stage*

... Junior: 2-3 years' experience

... Mid: 3-8 years' experience

... Senior: 8+ years' experience

Detail required for the matching process

Why are you interested in mentoring?*

Which professional skills and/or experience do you feel you could offer the most support, knowledge or advice in?*

What are your interests and hobbies outside of work?*

Key details - shared with your mentee

We will only share you name, role, email and friendly introduction with the mentee.

Please write a friendly introduction to yourself for your mentee - a short bio covering your role, area of expertise and interests/hobbies*

Sensitive personal information

Some mentees request to be mentored by someone with similar lived experience. It would help us if you could share any relevant information that we can use during the matching process.

This is considered sensitive personal data (also known as special category data). By giving us this information, you understand and agree that you are giving us your explicit consent to collect, store and use this data. This will not be shared with your mentee. There is an option on all questions to choose 'Prefer not to say'. If you want to change any responses, you can contact us to do so.

Sex/gender

Please select...

Have you already or are you currently undergoing gender reassignment?

Please select...

What is your ethnicity?*

Please select...

What is your sexual orientation?

Please select...

What is your religion/belief?

Please select...

Do you consider yourself to have a disability?

Please select...

Do you consider yourself to be from a lower socio-economic background?

Please select...

Do you, or have you ever, provided unpaid care for a family member who is ill, frail, disabled or has mental health or addiction problems ? (This might be a parent or sibling, for example.)

Please select...

Is there anything further you would like to share with us?

By using this form, you agree to York University storing and handling your data, plus contacting you with project updates and news*

Submit

Thank you!

FORM SUBMITTED SUCCESSFULLY

For future Mentees.

Reasons Why You Should Consider Becoming an ITEC Mentee

1. Improve your skill set
One of the foremost advantages of being the mentee in a mentoring relationship is having the opportunity to truly develop your existing skillet and also develop your current expertise. As a mentee, you'll work with someone mo experienced who can exchange their knowledge with you. Whether it's soft skills such as time management or hard skills such as marketing practices, your mentor will be able to supervise and assist you along the way.

2. Improved communication
Communication isn't solely about talking, it's equally as essential that as an individual we can listen and take in what's being said. Having a mentor with whom you have regular conversations with, can considerably enhance you how to effectively express your concerns, ideas and perspectives. A mentoring relationship also benefits listening skills as listening to your mentor and giving them your full attention is a part of the mentoring process. Listenin helps you improve how you take in information and what you do with it, for example listening to feedback and taking the right direction to improve on yourself.

3. Expand your network
Over the years your mentor more than likely has acquired a network of other professionals in the field or outside of it. Your mentor will be able to provide you with the chance to connect with these individuals on a personal lev your chances of having new professional possibilities.

4. Career progression
Finding a mentor can greatly improve the chances of progression within your career with mentees being 5 times more likely to be promoted. Having a mentor comes with many advantages such as improving productivity, seein perspective and providing you with feedback that can greatly enhance your career progression and work ethic. One of the main reasons people seek out a mentor is to become more successful in their industry and career, havin council to face any barriers along the way greatly eases the process.

5. Great feedback
A mentor wants to see you succeed, whether that be in your personal or professional life. By being a mentee you can be given honest feedback that directly reflects on your performance in an unbiased way. The feedback given al and strategically come up with solutions to the problems with the guidance of your mentor.

6. Learning about career paths
A great perk of being a mentee is the ability to connect with professionals from the same field or a new one. Whether you're switching career paths or a student contemplating your choices, being able to speak to someone withi start. The ability to obtain a perspective is sometimes what we need to make the change.

7. Encouragement
Sometimes, we all need an extra boost of motivation to solve our problems. Having a mentoring relationship means there's someone always there to give us that extra boost of encouragement when things get too tough or overwl encouragement from mentors means greater motivation to tackle the obstacles we face in life.

8. Goal setting
More than once in our lives we've all made goals and not stuck to them, whether it be managing our time better, getting a promotion or working on our skills. Having a mentor means someone is there to keep you accountable for keep us on the right track to completing them. Your mentor can work closely with you and help configure a solution to help you effectively meet your goals in the timeframe specified.

9. Trusted allies
Transparency in the workplace or our personal lives can sometimes feel difficult. Most people have felt the inability to trust others in the workforce, being unsure of their true intentions. Since mentors are there to help, we kn them and be more vulnerable with our concerns and ideas. Mentors aren't looking to judge you, but instead are looking to make suggestions that are both actionable and reasonable.

Ready to SignUp

ITEC Peer Mentorship- MENTEE Sign-up Form

Welcome to the ITEC Peer Mentorship program! Please complete the form below in order for you to be paired with a mentor from our Peer Mentorship program. By joining the program you would be committing to meeting with your mentor one hour per week/bi-week/month over a period of six months to discuss and receive advice on any questions you have.

By filling out this form you are signing-up to be a **MENTEE** this semester.

Name *

First Last

Preferred Name *

Student Number *

Preferred Email *

Program/Faculty *

I would like my Peer Mentor to focus on: *
